“Germany? But where is it? I don’t know how to find such a country.”
Johann Wolfgang von Goethe and Johann Christoph Friedrich Schiller, 1797

Praise for Localism, Landscape, and the Ambiguities of Place

‘Localism, Landscape, and the Ambiguities of Place is an outstanding edited collection that will have to be read by anyone with a serious interest in Imperial Germany ... This is truly a fabulous and path-breaking book that makes an invaluable contribution to the study of German history.’

Jan Palmowski, University of Warwick

‘A fresh and evocative study of the interplay between landscapes and localities in the shaping of modern German culture, politics, ideology, and identity.’

Michael B. Gross, East Carolina University, Central European History

‘The contribution this volume makes to the field of cultural studies goes well beyond its German scope. Its greatest contribution – the whole being larger than the sum of the parts – lies in its testing and stretching of theories of place and identity. In the end, Localism, Landscape, and the Ambiguities of Place exposes some of the very assumptions that have gone into the notion of hybridity itself.’

Peter Blickle, Western Michigan University, German Quarterly

‘[Blackbourn and Retallack] address the important question of how these various possible forms of collective identification could be combined in the minds of individuals ... [By focusing] the lens on the subnational level to trace ambiguous feelings of belonging over time ... the volume reminds us that questions of German identities became more, not less, complicated with the foundation of the Empire.’

Christian Müller, University of Applied Sciences and Arts, Göttingen, The Historical Journal
